

TEXTILE INDUSTRY & AUTOMATION

MAINTENANCE MACHINES

Cot Measuring RCT

The Cot Tester RCT can be used for measuring of roundness, cylindricity and diameter of all customary spinning cylinders.

Cot Mounting RCM-H

The hydraulic Cot Mounting Machine RCM-H is exclusively designed for accurate mounting and dismounting of long cots, e.g.: draw frame, comber and lapformer.

Cot Measuring RST 2

The Surface Tester RST 2 can be used for checking surface roughness parameters of covers of top rollers.

Cot Mounting RCM-P

The pneumatic Cot Mounting machine RCM-P is suitable for mounting and removing the cots of centre guided top rollers.

Cot Testing RHP

The Rosink tester RHP simply checks the shore hardness of the rubber cots.

UV Treatment RUV2

The RUV2 offers UV Radiation of the rubber surface to prevent lapping.

Lubrication machine RPLM

The pneumatic lubrication machine performs quick, double sided re-lubrication of top rollers.
